

ABSTRACT Guidelines

Abstract submission for NeuroGASTRO 2023

Guidelines for Preparation

A title that clearly indicates the nature of the investigation needs to be provided.

Abbreviations should be avoided in the abstract title, but may be used in the text if they are defined at first usage.

The authors' names (full first names, family names) and places of work (institution, city, country) will be filled out during the online procedure.

The abstract should be as informative as possible:

1. State the specific **objective** of the study
2. State the **methods** used, if pertinent
3. Summarize the **results** obtained
4. State the **conclusions** reached

A maximum of 10 authors can be added during submission of your abstract. In case where there are more than 10 authors, please use a group name. Please ensure that your abstract does not contain spelling, grammatical or scientific errors, as it will be reproduced exactly as submitted.

There will be prizes for the best Basic, Translational and Clinical Abstracts, where authors will be given the opportunity to deliver their paper at one of the plenary sessions. In addition, there will also be a prize for the best Trainees submission.

Guidelines for Submission

Abstracts may be submitted only electronically via the Abstract submission web platform.

Abstracts must be submitted by April 15, 2023 h. 11:59 pm.

- Abstracts sent by mail, email or fax will not be accepted.
- The length of the abstract should not exceed 350 words excluding author details and headers.
- The abstract should be structured as indicated in the guidelines. One figure can be included.
- Abstracts can be saved in draft status and completed before the deadline.
- The submission system will generate a temporary submission number that must be used in all correspondence. If you do not receive this number immediately after your submission by email, your abstract has not been registered.
- Choose one primary topic listed on the website which best corresponds to the content of your abstract. If you wish you can also select an alternative topic which however is not mandatory.
- Tick the relevant box corresponding to your preferred method of presentation. Note that the ESNM Scientific Committee may or may not consider this choice.

If you need to withdraw your abstract, a written statement reflecting the reasons for this decision needs to be sent to m.gorgoglione@planning.it no later than June 15, 2023.

Thereafter, ESNM cannot make any changes in its printed version of the abstract booklet.

TOPICS

Mechanisms underlying normal and disordered gastrointestinal function.

Pain mechanisms and visceral hypersensitivity

Role of the microbiome and diet in health and disease, including the role of host-microbe interactions

Dietary interventions, including pre-, pro- and syn- and postbiotics

Mechanisms and diagnostic techniques in food intolerance

Pathophysiological and clinical aspects of disorders of gut-brain interaction

Technologies for the assessment of gastrointestinal motility and perception

Current and future therapies for disordered gut function and disorders of gut-brain interaction,

Brain-gut interactions in health and disease

Epidemiology of disordered gut function and disorders of gut-brain interaction.
